MAVERICK *Mx-6 Touch*

Encoding exception items at the point-of-entry saves time and money.

Maverick's new *MX-6 Touch* Exception Item Encoder has both a standard keyboard for quick data entry and a Touch screen for navigation. If you had an older M6 series product, the Touch has function keys for accessing MICR fields as those products did.

Maverick became the industry standard for encoding products because of the ease of which the End User can make a changes upon demand. Program a function directly through the keyboard.

Snap in a ribbon, select a function, key in the data, and begin encoding.

The space saving *Mx-6 Touch* has a footprint about the size of a piece of paper and will allow you to improve customer service by encoding items at the branch level. Encode documents such as lobby deposits, counter checks, bonds, and repair items for reprocessing. The *Mx-6 Touch* will save valuable time and money by allowing you to present qualified items to the proof department. With minimal space requirements, this MICR encoder provides the optimal cost effective solution for exception item encoding.

ENCODER SPECIFICATIONS

Speed:	50 dpm
Length:	13.25 inches (33.7 cm)
Width:	8.0 inches (20.32 cm)
Height:	3.5 inches (8.89 cm)
Weight:	4.25 pounds (1.93 kg)
Keyboard:	30 keys and 20 Programmable functions
Display:	3x4 Full Color - Encode screen 16x2 large character
Ribbon:	Average yield of 25,000 - 30,000 characters
Power:	100-240 VAC, in-line desktop
Memory:	Non-Volatile, FLASH ROM
Encode Capability:	65 character/full field
Font:	E13B

Features and Benefits

Features and Benefits	
Encodes Single/Multipart Documents	✔
20 Programmable Function Keys	✔
3x4 color touchscreen & large character Encode screen	✔
Self-contained Ribbon Cartridge	✔
